Print and Copy Management  
*Coin-Op Systems*

# *Overview*

Print and Copy Management has become a standard within the library setting. OCS provides solutions which empower libraries to charge patrons for use, reduce wasteful printing, and provide a self-serve atmosphere to benefit both staff and patrons.

# *Features*

- Libraries have the ability to charge for printing and copying within the facility
- No billing required, all transactions are paid for in cash using a coin acceptor
- Users may send many jobs to the queue and print only the 'best source'
- Paper and resources are saved with the patron only printing what is needed
- Unprinted jobs auto delete after a set amount of time in the system
- Printing costs may be set with different rates for Black and White or Color pages
- OCS offers screens which can be displayed in many languages
- OCS provides several usage reports

# *System Layout*

User workstations – all operating systems

Users print from their workstation and go to a central Print Release Station.

PC Print Release Station

Cash/Card Acceptor

# POP-UP Screen

[1152 x 864]

**YOUR INSTITUTION**

Black and White

Total Pages = 1

Total Cost = 0.10

Your job will be retained for 3.00 hr

Your Name

Description (Optional)

Once the patron prints from the workstation a POP-UP screen displays the cost and allows the user to name the job.

The job is then sent to the Print Release Station

The POP-UP screen is completely configurable to your specifications.

All text and fields can be edited and foreign language tables are available.

# Print Release Station

Each job is identified using the name the patron specified.

The user selects their job and clicks on 'print'.

OCS Print Release Station -- 10.1.1.1

Queue/Printer	Qty of Jobs	Queue	Server	Jobs	Owner/Job Name	Jobs
